

# PROTECT YOUR LICENSING ECOSYSTEM

Manage Compliance Throughout the Licensing Lifecycle

Licensing has evolved into a complex business that requires an enterprise point-of-view. Standalone, single function software tools just won't cut it anymore. That's where brandcomply.com can help.

BrandComply is focused on leveraging our integrated platform to deliver solutions that work how you work. Stop trying to fit into software buckets, and start working in an environment that will help you deliver the results you need to get your job done well.

Our team of Licensing Veterans have been in your seat. They understand the challenges and demands placed on you to deliver results. They also understand how to work smarter, faster and with the key objectives in mind. Whether your role is Category Manager, Contract Compliance, Product Specialist, Product Compliance Specialist, or Business Unit Manager, we have been there. Our team is focused on helping you get your job done, not trying to squeeze your role into a single software module. So stop talking to software "suppliers", and come see why more brands are going with the Octane5 Solution.

## ONE Integrated Licensing Enterprise Management System

**THREADS**  
SECURITY HANGTAGS & LABELS

**Born from Currency.  
Bred for Licensing.™**

When the founders of Octane5 set out to invent what is next in licensing brand protection, they immediately formed a partnership with De La Rue, the world's leading security printer and currency producer. This unique collaboration between the two organizations led to the invention of Threads™: the most secure and flexible hang tag and label technology ever introduced to the licensing industry.

Since its' birth, Threads hang tag and stickers have become the leading technology in corporate licensing. Ask us how Threads™ can help protect and bring a higher level of compliance for your brand and connect you to your consumer.
